valkyria chronicles 4 expert level skirmishes

Pixel Space is a very simple but very fun bullet hell-like game. Just don't expect to spend too much time on it.. This "game" is not even worth getting for cards.. It is not worth the \$10 USA. There is supposed to be some "special menu" where I would get different weapons - not in this version. Just... I was not "feeling" it with this. Hopefully I will get better results with the next one. I did appreciate the computer guys I could easily send around the corner and die for me so I didn't have to. That was great.. This is game is almost the same as the original Age of Castles (Which I bought in 2006)

The game is very simplistic and easy to win. No real strategy required, brute forcing the game by spamming days is even enough to win.

I still get some mild enjoyment and satisfaction out of the game but it is quite hollow due to the little effort and how short the game is.

Game takes no more than an hour to complete so definately a long way from the \u00a33.99 price tag, may recommend if it were -90%. This finally works on Linux based computers. Yay! It is a very enjoyable game. I think the little furlings are so adorable. Totally worth the \$5 I paid for the game. No downsides. Tutorial is excellent. Main game is wonderful. I find this game relaxing as it gives me a sense of control in my otherwise uncontrollable life! :D So buy it & enjoy!. Expensive dlc. Win7 64bit start problem solution:

Start menu > Control Panel > Hardware and Sound > Sound > Double-click on primary playback device > Advanced tab > Set format to 24-bit 44.1khz or 48khz. High quality old school platformer, it has full joypad support and the controls and gameplay dynamics are spot on. You just need to get to the exit on every level but there are hidden secrets which gives this game some replay value. The ending hints at a sequel - hope it comes to fruition. There's a few hours of gameplay here so it's well worth the money.

Its Nice for gameplays For YouTube. Only AI, theres no PvP. Cute little adventure in the fairy forest. The game has 2 critical bugs at the end.

7V10. Damn nice game, be sure to change the install path from the disciples.ini to get the game working perfectly. For more info check the link below.

<http://steamcommunity.com/app/281450/discussions/0/613937943176590167/>. Should have been in normal game. Haven't noticed any of these units anywhere.. The hearts of Iron game that's going to be the frendliest to your CPU. Besides that at least this is my favorite paradox game. It knows what it is, a WW2 grand strategy game. It doesn't need any fancy graphics or anything like that to make it look pretty, it just plays well. I do have one thing to add, however, if you are looking to buy this game I would take a look at darkest hour as well, I haven't played it but it does seem to have some features that aren't in this one.
